- Easy-to-Use Technology
- Connecting Seniors with Support

Profile Management Features and Benefits

Explore the essential aspects of profile management

Simple login options

Users can easily log in using various methods, such as Google, email, and phone number, enhancing the user experience.

Easy profile editing

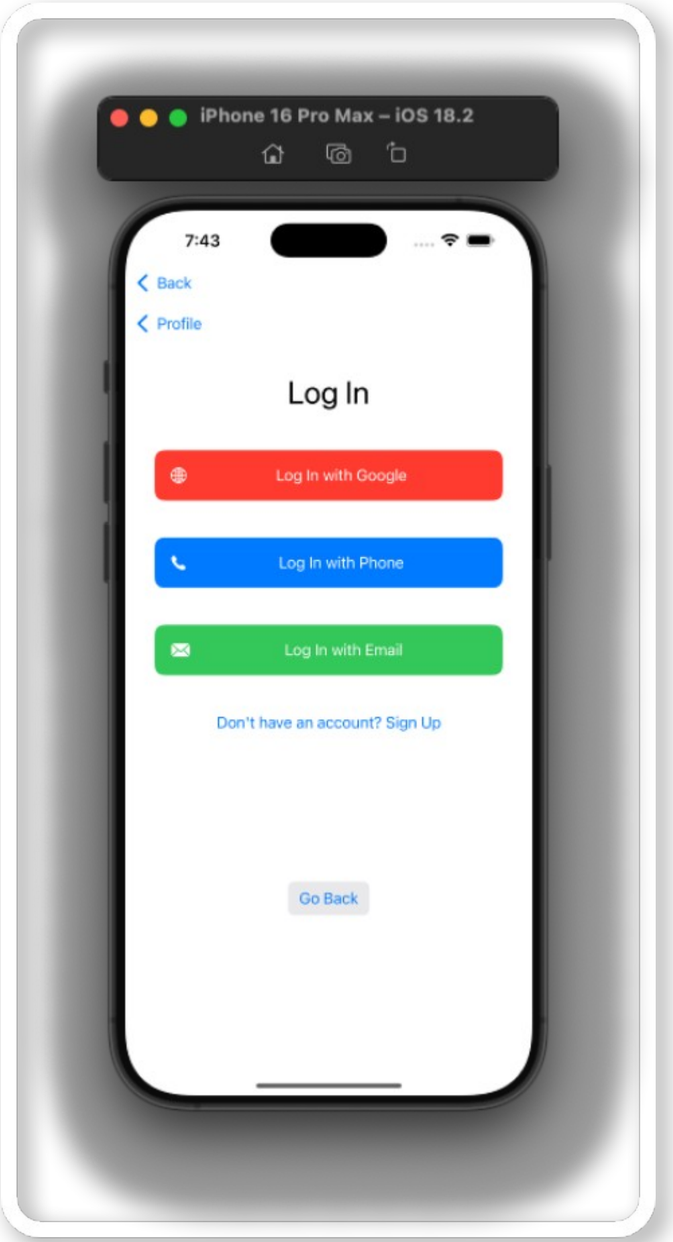
Updating personal information is straightforward, ensuring users can keep their profiles current.

Emergency contact storage

Users can store their primary emergency contact for quick access during emergencies, increasing safety.

Easy account management

Managing account settings is made easy, allowing users to navigate their profiles effortlessly.



FacesTrivia For Memory Helper

Photo Storage

Save photos of people to keep track of social connections.

Contact Details

Add details like name, email address, and where you met to enhance memory recall.

Face Recognition

Helps remember faces and connections effectively.

Reduce Memory Anxiety

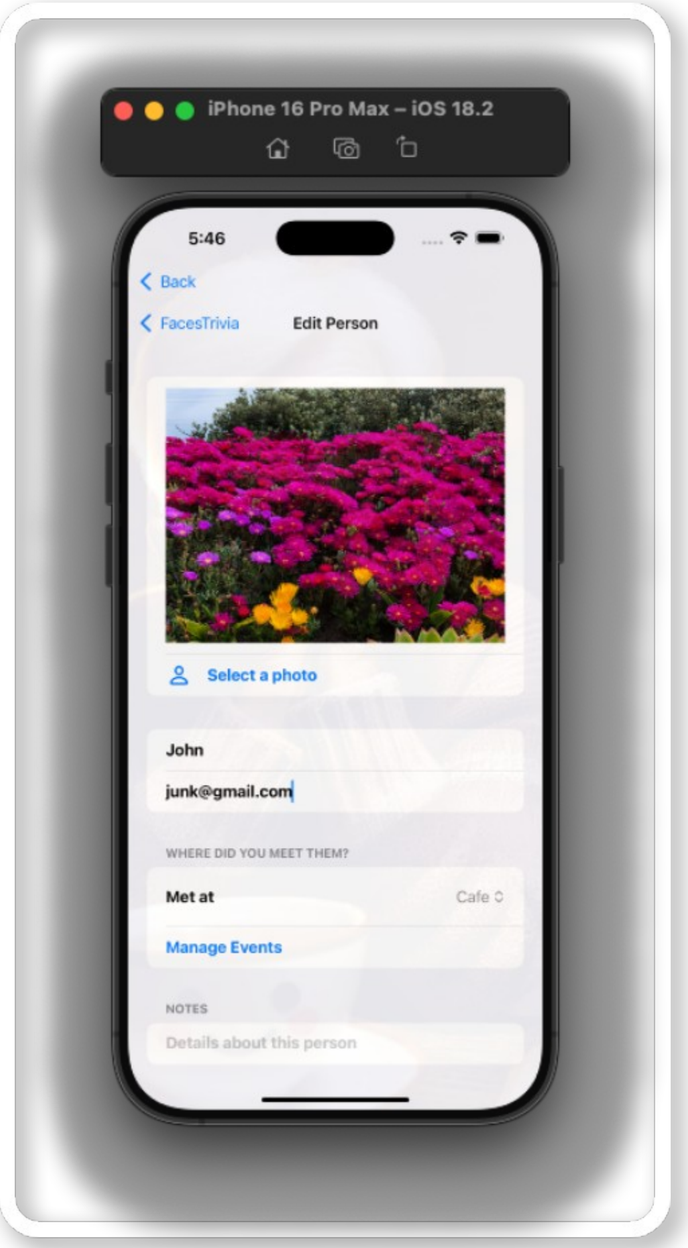
Minimize the stress associated with remembering names and faces.

Strengthen Social Connections

Maintain and nurture relationships through visual reminders.

User-Friendly Design

Easy to use with visual hints that enhance memory retention.



Emergency Response Features and Highlights

Explore key features and safety highlights

Instant Help Features

Includes one-touch SOS button, quick emergency access, location sharing, and fall detection alerts.

Immediate Assistance

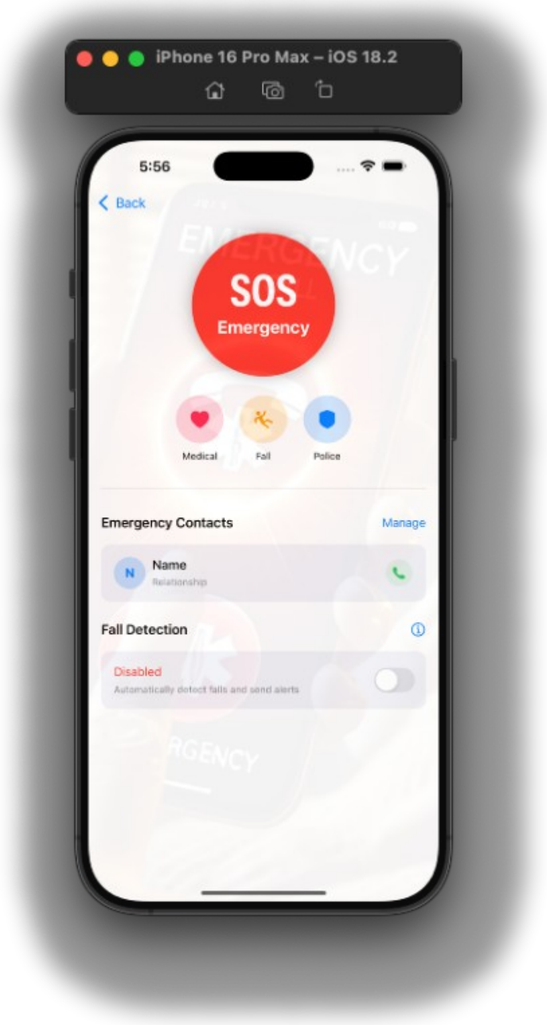
Provides immediate help when needed, ensuring users can get support quickly.

Automatic Notifications

Contacts are notified automatically, reducing response time during emergencies.

Medical Information Availability

Medical information is readily available for responders to provide appropriate care.



Health Tracking and Monitoring Systems

Essential Metrics for Health and Wellness Monitoring

Heart Rate Monitoring

Continuous heart rate tracking helps detect irregularities, allowing for timely intervention if there are any health concerns.

Sleep Patterns Analysis

Helps identify issues like insomnia or sleep apnea, which are critical for overall health and well-being.

Daily Wellness Tracking

Helps both users and caregivers track improvements or declines.

Simple Charts for Data Visualization

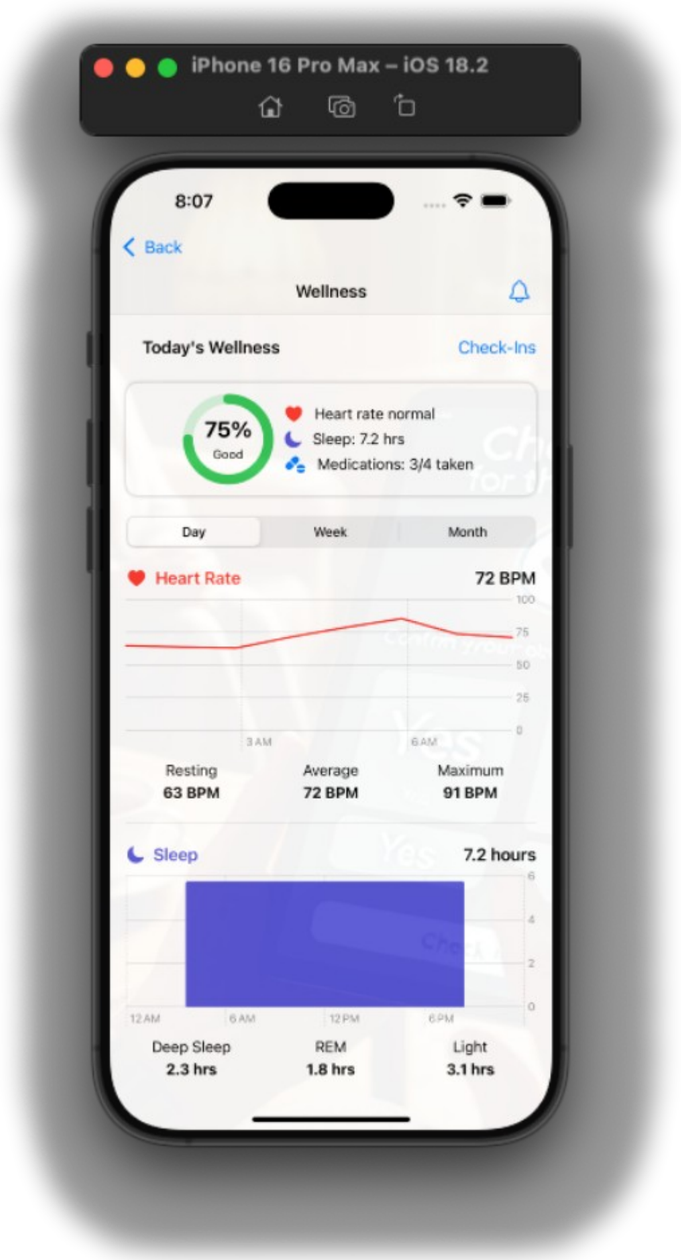
Designed for elders to make it simple to visualize health data and track progress over time.

Color-Coded Health Status

Provides immediate visual hints about a user's condition, allowing for quick responses to health changes.

User-Friendly Insights

Helps elderly users understand their health and take action when needed.



Location & Battery Safety Features

GPS and battery management systems

GPS Monitoring

Utilizes GPS technology for real-time tracking.

Safe Zone Alerts

Notifies users when devices move outside designated safe zones.

Family Notifications

Alerts family members about the device's location updates.

Battery Level Tracking

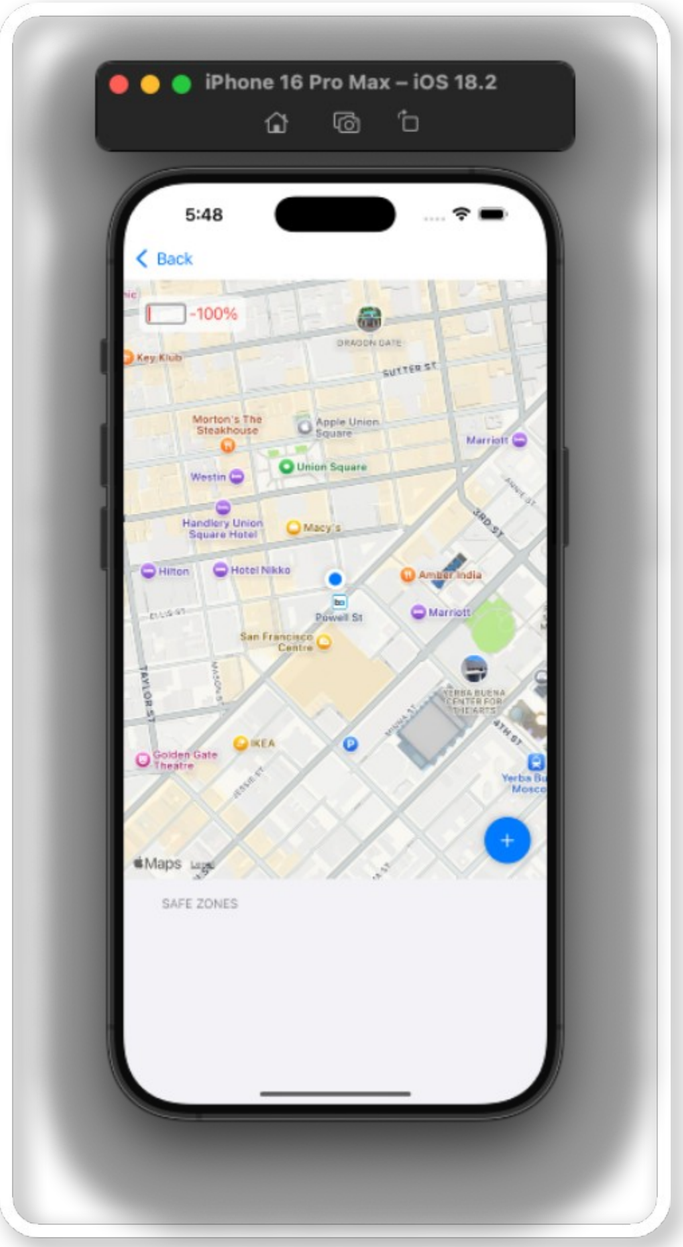
Monitors the device's battery status continuously.

Low Battery Warnings

Sends alerts when battery levels drop to critical levels.

Charging Status Updates

Provides updates on the charging process of the device.



Meal Tracking Made Easy

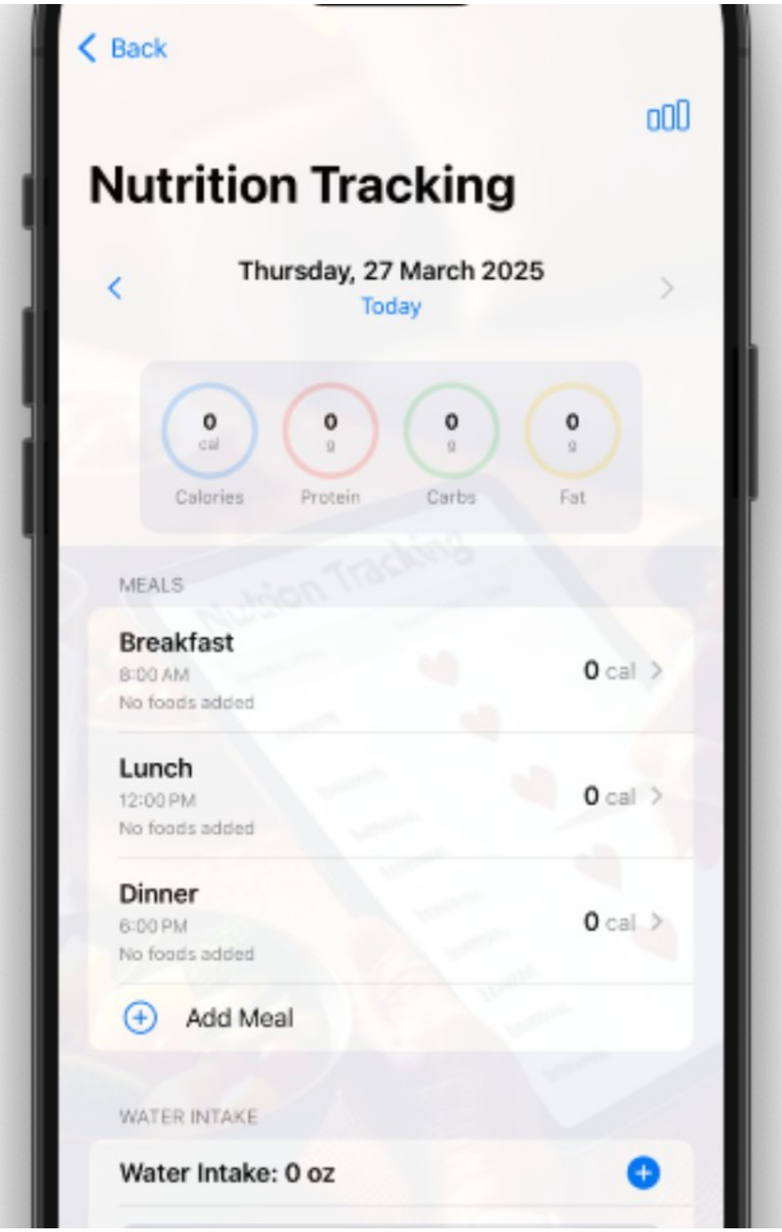
Add meals quickly and efficiently with easy made interfaces for all users.

Nutrition Calculation

Allow users to enter their calorie data manually to track their diet accurately.

Water Intake Monitoring

Keep track of daily water intake to stay hydrated and healthy.

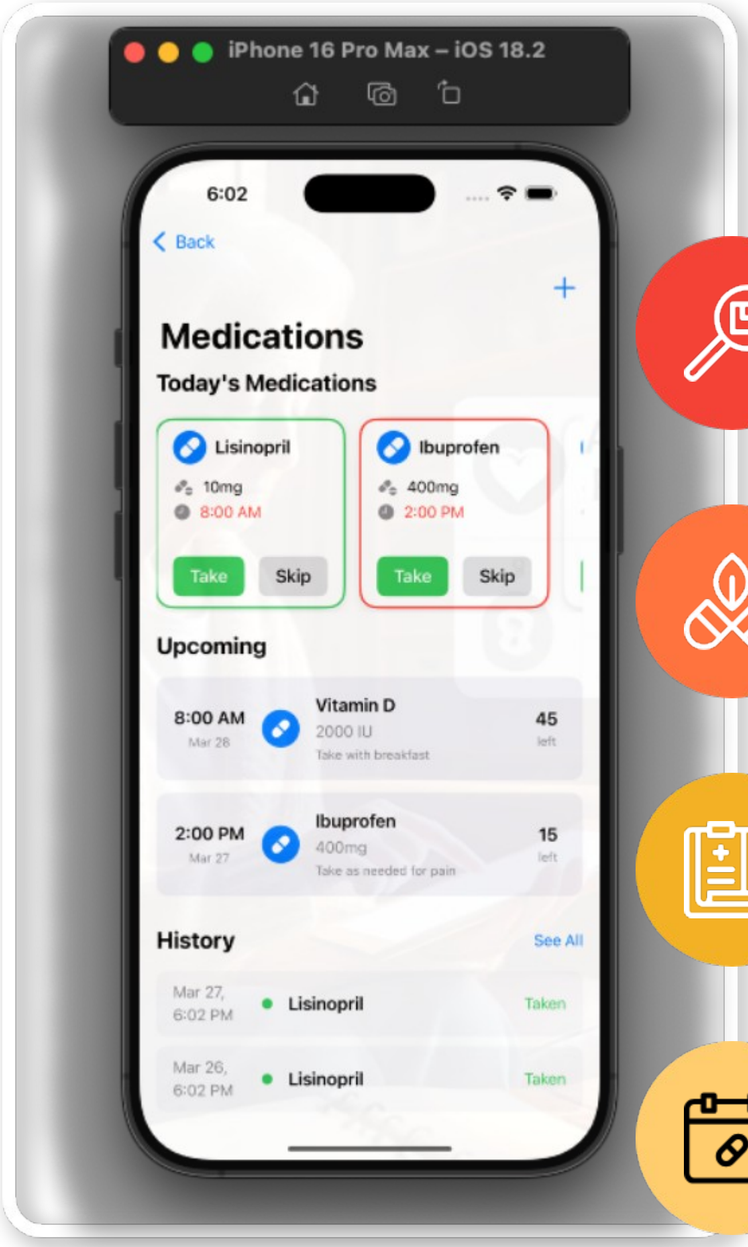


Benefits of Meal Tracking

Enjoy the advantages of balanced diet monitoring and healthier eating habits.

Simplified Food Logging

Log food easily with minimal effort, promoting better dietary choices.



Medication Management Solutions

Explore features and benefits of medication management

Track all medications

Easily monitor all prescribed medications in one location for convenience.

Reminders for doses

Automated alerts ensure users never miss a scheduled medication dose.

Medication history

Access a complete history of medication usage to track adherence.

Easy scheduling

Intuitive scheduling helps users plan their medication with ease.

Therapy Management Options

Therapy Options

Simple exercise movements designed for the elderly to help them stay active and mobile.

Customizable Sessions

Adjust the duration of therapy sessions to fit individual schedules.

Progress Tracking

Monitor your progress effectively to stay motivated and on track.

Weather Tracking

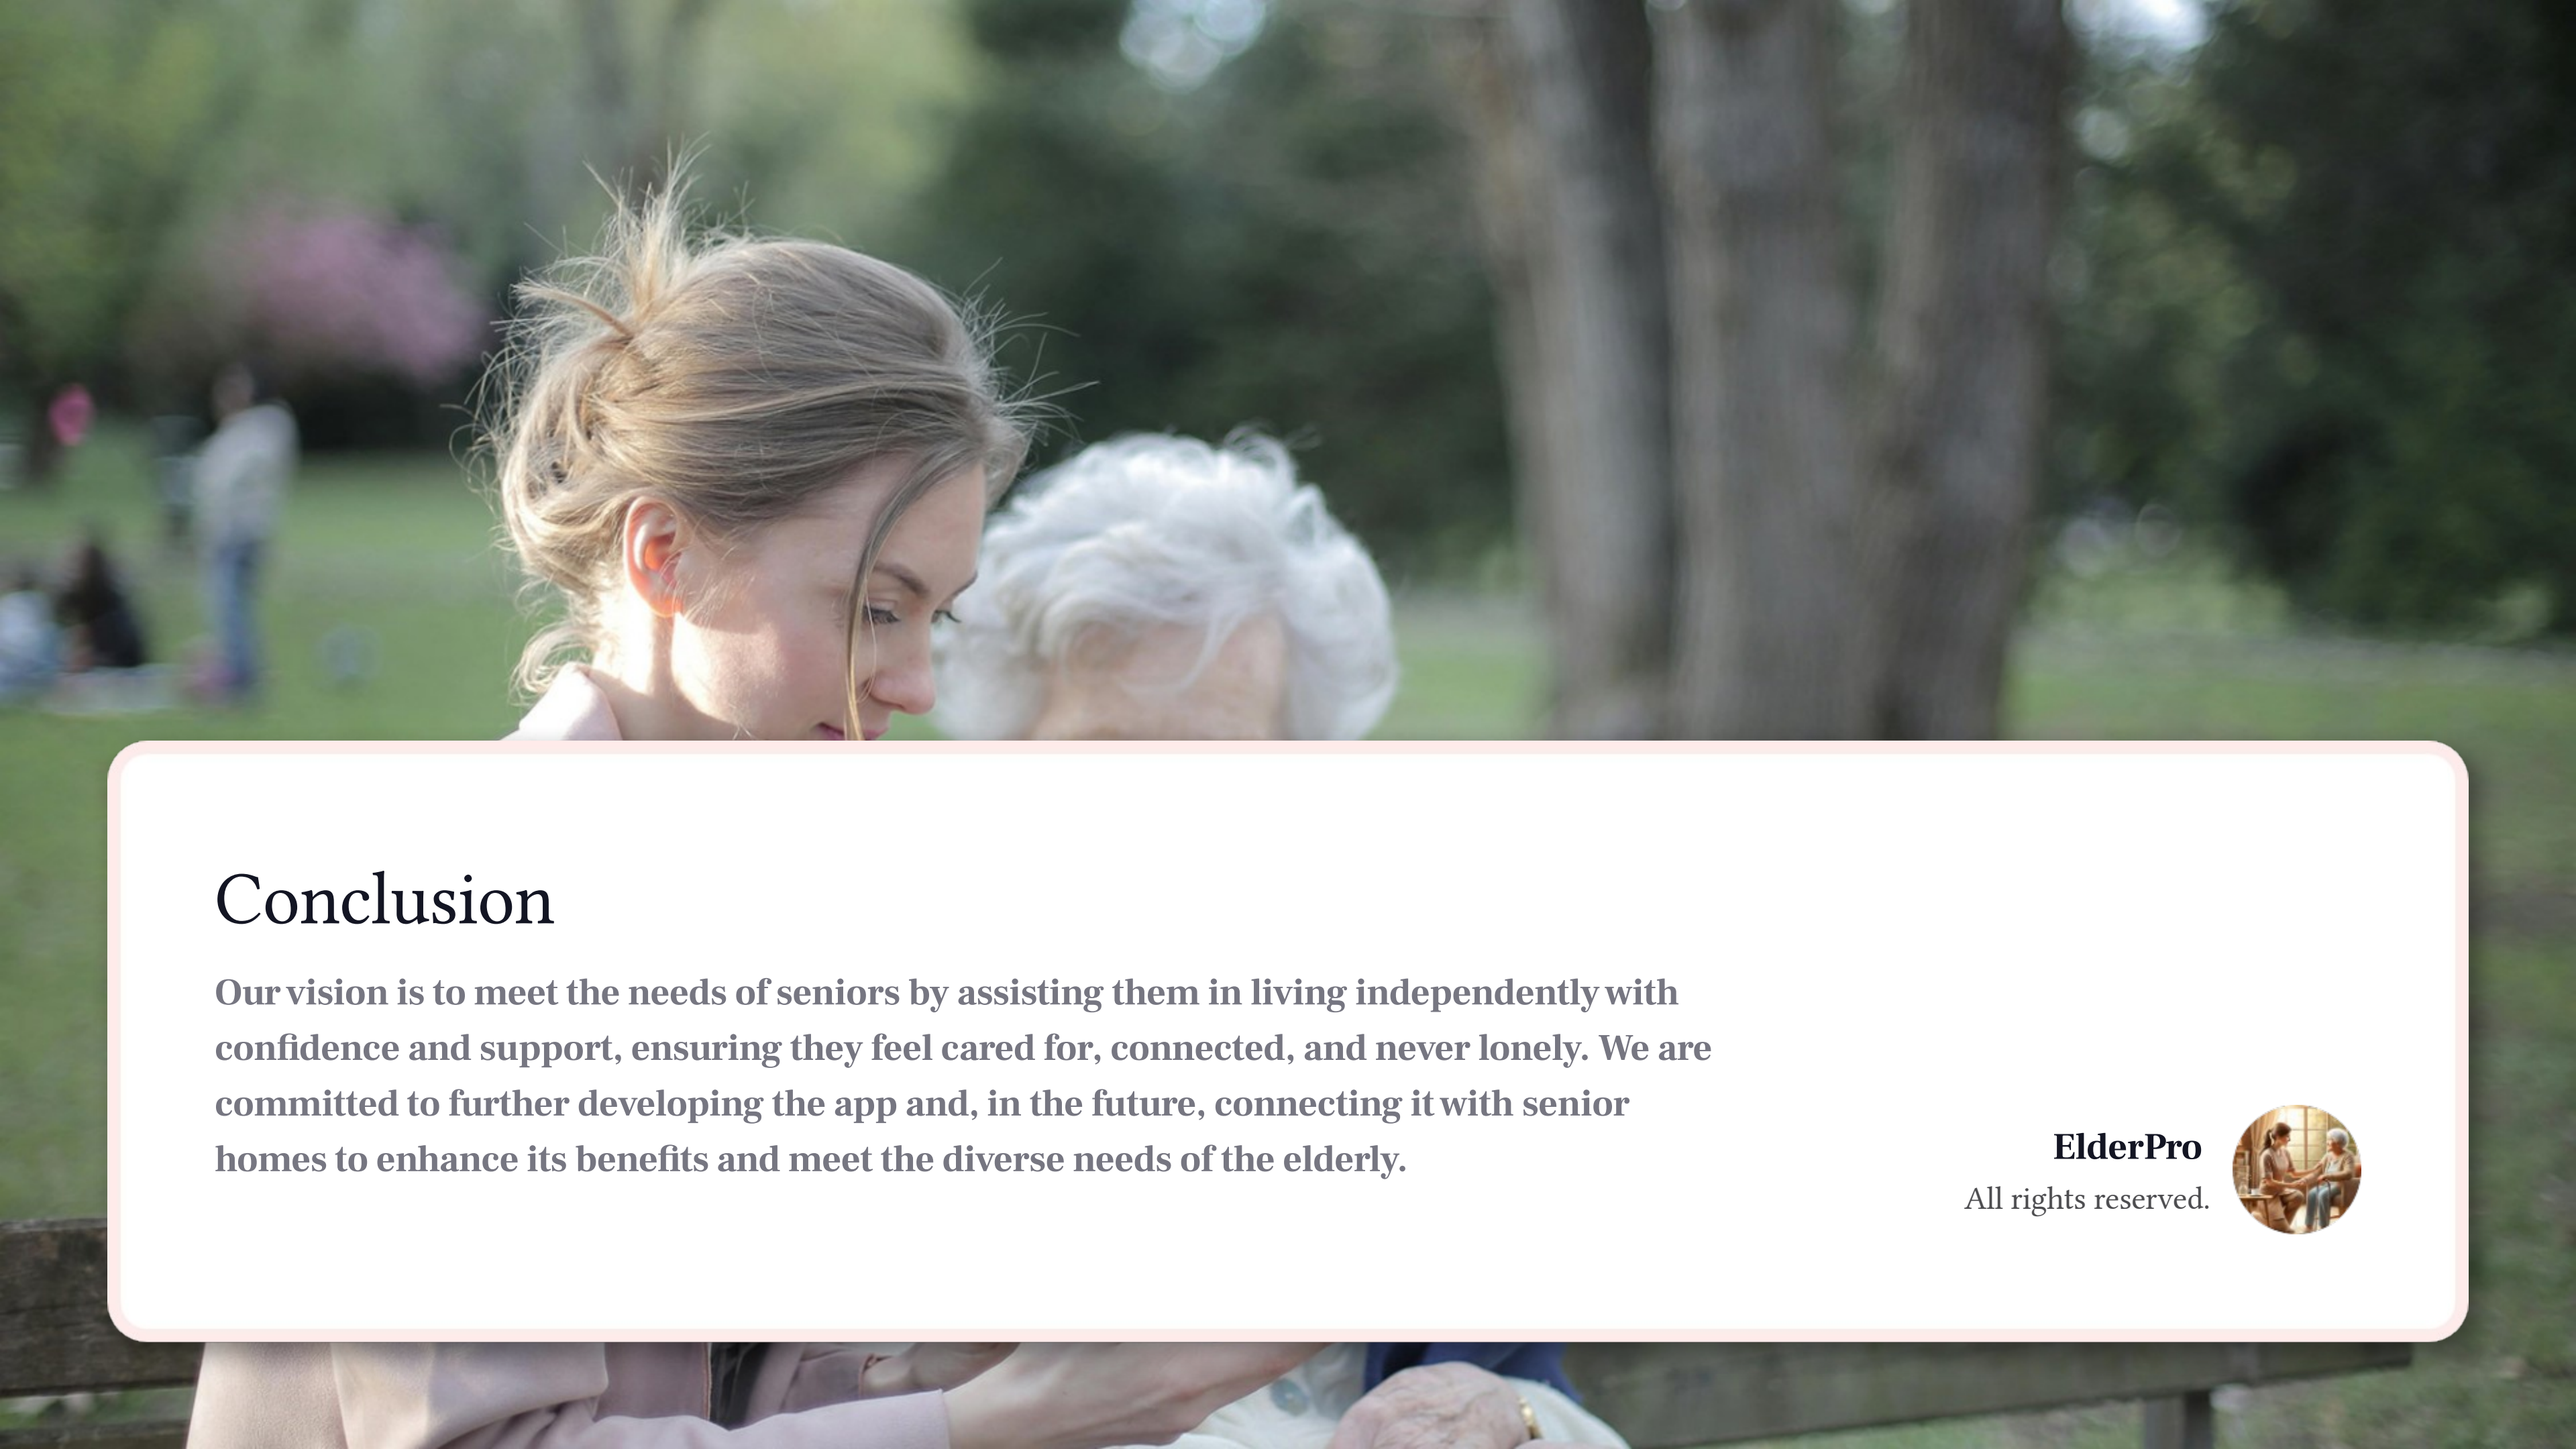
A weather feature to check the current weather, allowing elders to track weather changes.

User-Friendly Experience

Designed to be easy to follow, even for beginners.

History Logs

History section to track daily completed or stopped exercises



Conclusion

Our vision is to meet the needs of seniors by assisting them in living independently with confidence and support, ensuring they feel cared for, connected, and never lonely. We are committed to further developing the app and, in the future, connecting it with senior homes to enhance its benefits and meet the diverse needs of the elderly.
