EXPERIENCE

Ultimate Solutions Egypt

Full Stack Developer (.NET & Angular)

November 2025 - Present

Giza, Egypt

- Develop and maintain the SKey ERP platform using Angular and ASP.NET Core/.NET technologies.
- Design and implement end-to-end ERP features for Hospital, Purchase, and Inventory modules while collaborating with cross-functional teams.
- Translate business requirements into end-to-end features, including Angular UI, REST APIs, business logic, and database integration.
- Debug and resolve system issues across frontend and backend layers to ensure stable enterprise application performance.

Transcom WorldWide – Apple Inc

Technical Support Advisor (Remote)

May 2023 - January 2024

Windsor, Canada

- Provided Level 1 technical support for Apple customers across iOS, iPadOS, and macOS, delivering clear and professional assistance.
- Guided users through troubleshooting steps including account recovery, Apple ID issues, data migration, backups, and network connectivity problems, adapting explanations for non-technical users.
- Documented support cases accurately and coordinated with repair teams to ensure timely resolution.
- Escalated complex issues to higher support tiers while maintaining service quality and customer satisfaction.

Sutherland Global – AT&T

Technical Support

May 2022 – April 2023

Windsor, Canada

- Provided Level 2 technical support to field technicians for routing systems, VoIP services, IPTV services, transport mediums, and bandwidth profile changes.
- Resolved technical issues using internal knowledge articles and company-provided software such as CRM applications.
- Escalated unresolved issues to avoid service delivery delays.
- Maintained high performance under pressure while managing multiple simultaneous support requests.

PROJECTS

ElderPro – iOS App | *SwiftUI, Firebase, Twilio, Apple HealthKit*

Graduation Project – University of Windsor

Overview: Designed and developed a mobile app to improve safety and health for elderly individuals.

- **Faces Trivia:** Memory helper using photo storage and face recognition.
- **Emergency:** Fall detection, real-time notifications, and easy access to medical info.
- **Health Monitoring:** Integrated Apple HealthKit for heart rate and sleep tracking, with visual summaries.
- **Location & Battery Safety:** GPS tracking, safe zone alerts, and low battery notifications.
- **Medication & Nutrition:** Reminders, intake tracking, and nutrition logging.
- **Therapy Management:** Mobility exercises with progress history and weather tracking.
- **Real-Time Communication:** Twilio integration for SMS and emergency alerts.
- **User Authentication:** Firebase Firestore, supporting email, phone, and Google login.
- **Links:** Project showcased in my [Portfolio](#). Additional projects and source code available on my [GitHub](#).
